

## The Calyx India Advantage

**Calyx** has a 28-year history of building up successful partnerships. Calyx is poised to actively participate in this growing opportunity of outsourcing and contract manufacturing. It is the one stop solution provider for **Custom Synthesis, FTE Research, Contract Manufacturing, Intermediates and APIs.**

The multipurpose manufacturing plants have capabilities to produce from grams to tons in compliance with cGMP, USFDA, WHO, EDQM, ISO 9001:200, IHS and COS norms, while, our global footprint includes marketing and sales offices in US, Japan and sourcing office in China . This enhanced communication and working 24x7 fosters business relations.

**Calyx**, over the years, has systematically harnessed resources and developed a capability that spans the entire spectrum of vital services. It includes focus on integrated chemistry solutions ranging from discovery chemistry, route scouting, process research, scale up and analytical support. Capability to handle critical and innovative chemistry ensures expertise in delivering diverse molecules in timely and cost effective manner. Commitment to IPR and CDAs supported with system security and firewall ensures smooth project management.

Latest creation of new R&D facility is geared up to house 300 scientists, with Process Labs, cGMP Kilo Labs, Analytical Labs, along with cGMP Pilot Plant facility to ensure enhanced productivity for **CRAMS (Contract Research and Manufacturing Services).**

In the past few years, the Company has entered into agreements with companies across the world and has become an **integral part of their supply chain.**

**Calyx** offers a range of APIs, chemical intermediates and building blocks to Pharmaceuticals, Biotech, Chemical and Drug discovery companies. This includes Pyrazines, Tetrazoles, benzimidazoles, Thiazoles, Methylenedioxy phenyl derivatives, Protected amino acids, Dipeptides, Zopiclone, Pyrazinamide, Erythromycin salts and many more.

Passion for excellence and commitment in quality, safety, environment and technical capabilities enables **Calyx** to deliver in a highly professional manner and with a sense of urgency while upholding the highest business ethics.
